Cited from [endi.com](http://www.endi.com) ^[2] "The donation is part of the agreements between the municipality of Barceloneta, the pharmaceutical industries of the region and the Turabo University, to establish a teaching institution directed to graduate professionals in the pharmaceutical industry field." The municipality bought an empty building, and "habilitated it to house the more than 100 students that have registered in this center for the next school year." Other 900 students registered in the University of the East in Manatí will also move to these new facilities. "The academic offerings in this Center are in accordance with the necessities of the pharmaceutical industries, thus adjusting the courses offered to the market requirements."
