El manatí antillano está en peligro de extinción y el Plan de Acción de Mamíferos Marinos de las Naciones Unidas dice que hay que protegerlos y que tienen que unirse los países que tengan esta especie para colaborar. (Archivo)

ONU recognizes the conservation efforts with the manatíes in Puerto Rico as a model that can be replicated with other species in other countries.

The original news story is in Spanish. To read the full text, please click on the "Español" button below or the link at the top right of the page.
