

Meet the next “quenepas”: longan and rambutan ^[1]

Submitted by [Wilson Gonzalez-Espada](#) ^[2] on 12 January 2014 - 4:53pm

^[2]

Rating:

Scientist Ricardo Goenaga recently published several articles where he described to what extent longan and rambutan fruits could be grown in Puerto Rico at a commercial scale, and what factors can maximize crop yields. The full document is available only in Spanish.
