Researchers from the School of Medicine of the Medical Sciences Campus (RCM) of the University of Puerto Rico (UPR) have found for the first time characteristics of the immune response to Covid-19 in Puerto Rico. The group of researchers, led by Dr. Carlos Sariol, Researcher and Director of the Comparative Medicine Unit and Dr. Ana M. Espino, professor and Director of the Parasite Immunology Laboratory of the Department of Microbiology, recently published the results of the study in the prestigious scientific journal Viruses.
