En las playas de Santurce hay una barrera natural contra las marejadas y la erosión, que sirve de criadero a diversas especies y de área de protección para aquellas amenazadas o en peligro de extinción. (Gerald López Cepero)

This article discusses the Santurce beaches (Ocean Park, Punta Las Marías, Último Trolley, Condado and Condadito) and the coral reef that protects them from erosion. Their positive impact on the economy is also addressed.

The original article is available in Spanish.
