★★★★★

Marla Rivera-Oliver, a graduate student at the Institute of Neurobiology of the University of Puerto Rico, was selected to present her research in the oral Neuroscience session at the Southeast Regional IDeA conference in Biloxi, MS (Nov 11-13, 2015). Marla's presentation, "The Modulatory Effects of Caffeine on the Intrinsic Properties of Spinal Lateral Motoneurons", a collaboration with Yocasta Alvarez-Bagnarol and her research mentor Dr. Manuel Diaz-Rios, received a commemorative certificate and a \$500 award. She was the only neuroscience graduate student to be selected for an oral presentation.

We are proud of Marla, who is also a volunteer with CienciaPR. Congratulations!
