

NEURO-ID RESEARCH PROGRAM APPLICATION ^[1]

Submitted by [Paola Figueroa Delgado](#) ^[2] on 27 January 2017 - 10:25am

**NEURO-ID PROGRAM
APPLY TODAY!**

Deadline: March 13, 2017

About

NEURO-ID is a research program designed to increase diversity in Neuroscience by providing opportunities to undergraduate students interested in this area and enhance their scientific knowledge, research capability and social responsibility.

Who can apply?

Undergraduates at the end of their sophomore year or students who have at least two more years of academic work toward their bachelor's degree. Students from University of Puerto Rico, Río Piedras, Universidad del Este, Interamerican University of Puerto Rico at Bayamón, Interamerican University of Puerto Rico at Metropolitan Campus, Metropolitan University and Sacred Heart University studying Biology, Chemistry, General Sciences or Psychology are eligible to apply.

Requirements

- Online Application
- GPA > 3.2
- Official School Transcripts
- Two Letters of Recommendation
- Essay on career goals and interest in neuroscience

  **ENDURE**
NIH Blueprint for Neuroscience Research

Dear Ciencia Puerto Rico Community,

ABOUT

NEURO-ID (Neuroscience Research Opportunity to Increase Diversity) is a competitive research program designed to increase diversity in Neuroscience by providing opportunities to undergraduate students interested in pursuing a graduate degree and enhance their scientific knowledge, research capability and social responsibility. Research experiences will take place during the semester in one of the UPR research laboratories and during the summer in one of our collaborators' laboratories in the United States. Parallel to these experiences, students will participate in other activities aimed at strengthening their professional development and also at providing a strong understanding of the function and diseases of the nervous system. A novel part of the NEURO-ID program is the integration of components that will expose undergraduate students to the overreaching power of a scientific career through community outreach activities.

The proposed training plan includes the integration of biomedical and behavioral research activities to expose students to different aspects of Neuroscience research. The undergraduate students will be selected from Biology, Chemistry, General Sciences and Psychology, allowing the exchange of, and exposure to, diverse research topics and interests. In addition, a mentoring program that includes researchers at the UPR and universities in the United States will serve as a support system, not only during the undergraduate training program but also through their graduate studies. The integration of "role-models" at the UPR and other universities in the United States will provide the selected students with the opportunity to exchange their experiences, difficulties and find answers to questions encountered in the course of their training as researchers. All together, the NeuroID program will serve to develop and validate a combination of best practices and strategies to promote, enhance and strengthen the interest of undergraduate students for a research career in Neuroscience.

ELIGIBILITY

- Undergraduate students at the end of their sophomore year or students who have at least two more years of academic work towards their bachelor's degree.
- Students from the following institutions:
 - University of Puerto Rico, Río Piedras Campus
 - University of the East (UNE)
 - Interamerican University of Puerto Rico, Bayamón Campus
 - Interamerican University of Puerto Rico, Metropolitan Campus
 - Metropolitan University
 - Sacred Heart University
- Fields of study:
 - Biology
 - Chemistry
 - General Sciences
 - Psychology

REQUIREMENTS

- Online Application < <http://neuroid.uprrp.edu/index.php/about/application-form/> [3] >
- Two Letters of Recommendation

- Official School Transcripts
- GPA > 3.2
- Essay (career goals and interest in neuroscience research)

DEADLINE

Application and Supplementary Information due: **Monday, March 13, 2017**
