Cada 'pin' dentro del mapa incluye la dirección física, dirección electrónica y dónde se puede conseguir el informe que trabaja cada institución (Archivo).

The Station for the Detection of Spores and Fungi from the Medical Sciences Campus at the University of Puerto Rico has joined the '*Worldwide Pollen Monitoring Map*' from the ZAUM Center for Allergies and the Environment in Germany. This interactive map shares information on the levels of fungi, pollen, desert dust and other allergens, and being included in this initiative is recognition of the work being done at UPR-RCM.
