Así lucía el Observatorio de Arecibo tras el paso del huracán María. (Ramón Tonito Zayas)

Although it is located in one of the highest areas of Arecibo, the hurricane winds of Maria did not cause havoc in the Arecibo Observatory, and as soon as this Friday, scientific activities should be normalized there.

"We had some minor damage ... We were very lucky," said the director of the Observatory's Center for Geospatial Studies, Tony Van Eyken.

He explained that the telescope platform was not damaged, only an antenna that can be repaired was affected.
