The Institute of Neurobiology at the University of Puerto Rico Medical Sciences Campus seeks applicants for a full-time, tenure-track position at the Assistant or Associate Professor level. Candidates should apply genetic techniques to fundamental problems in developmental or systems neuroscience. The candidate should hold a doctoral degree, a minimum of two years postdoctoral training, research productivity commensurate with experience and a commitment to developing an independent research program. Although this is a research position, opportunities to obtain an academic appointment in a relevant department of the School of Medicine are available. The successful candidate will also have an opportunity to establish a core facility in his or her area of expertise. Send curriculum vitae, a brief description of research and teaching interests, the names, addresses, telephone numbers and e-mails of three referees, and, if possible, reprints of one or two significant recent publications to: Dr. Jonathan Blagburn, Search Committee, Institute of Neurobiology, 201 Boulevard del Valle, San Juan, PR 00901. In order to receive full consideration, applications should be received by January 15, 2007. For general information see the Institute webpage at www.neuro.upr.edu ^[2] or contact Dr. Jonathan Blagburn at jmblagbu@neuro.upr.edu ^[3] UPR-MSC is an Equal Opportunity / Affirmative Action Employer.
