Part II. Mechanism of formation of guanine as one of the major products in the 254 nm photolysis of guanine derivatives: Concentration and pH effects [1]

Submitted by Carlos E Crespo-Hernández [2] on 1 February 2013 - 2:00pm

 [2]

Title	Part II. Mechanism of formation of guanine as one of the major products in the 254 nm photolysis of guanine derivatives: Concentration and pH effects
Publication Type	Journal Article
Year of Publication	2000
Authors	Crespo-Hernández, CE [3], Arce, R [4]
Journal	Photochem. Photobiol.Photochem. Photobiol.
Volume	71
Pagination	544-550
