Giovanni Collazo, Jose Padilla and Rodriguez Elving devised a tool that allows free-lance professionals and small businesses collaboration tools needed to complete a project from start to finish, even if people who are on the team are not in the same physical location.

Blimp is the name of the application, which for now is available online in a free version and a Professional suite, which has a monthly fee of \$ 12. Developers are already working on the mobile theme.

In less than a year, the young developers have gotten about 4,000 companies in 100 countries to adopt the program, and the growth is constant.

The original news story is in Spanish. To read the full text, please click on the "Español" button below or the link at the top right of the page.
