## Let's Talk Scientific Exploration!

Three experts judge  
ten young scientists as  
they spin tall-but-true  
tales of climate  
change, planets  
orbiting other stars,  
the origins of life,  
futuristic batteries,  
and much more - in 3  
powerpoint-free  
minutes each!

Come cheer on these  
brave souls - vote for  
your favorite - and  
journey with them to  
the cutting edge  
of exploring  
Earth and  
beyond!
