

Accomplishing Career Transitions (ACT) Program

The American Society for Cell Biology (ASCB) is an inclusive, international community of biologists studying the cell, the fundamental unit of life.

The ASCB offers the Accomplishing Career Transitions (ACT) program for senior-level postdocs and junior faculty. The goal of the program is to help postdocs obtain a faculty position and to help junior faculty obtain tenure. This two-year funded professional development program will prepare successful transition into your next career path.

How?

- Hybrid program, combining in-person and online sessions
- Cohort-based, near-peer, and peer mentoring
- Customized training
- Active career management
- Acquire new skills through an individualized practicum

More info on training>>

Deadline to apply: [March 28, 2021](#)
