

Paid Science Research Opportunities Available for Community College Students Now Recruiting!

Apply now to become a Rose Hills Foundation Fellow at the Oak Crest Institute of Science!

This internship program provides community college students with the unique and valuable opportunity to **perform high-impact, independent research** in environmental science.

Two Types of Internship Positions Available:

6-month internship: for students who DO plan to transfer to a 4-year school

1-year internship: for students who DO NOT plan to transfer to a 4-year school; upon successful completion of the program, assistance will be provided to place you in a full-time research job

Research projects available in 3 areas:

- ✓ Microbial ecology
- ✓ Natural products screening for new therapeutics
- ✓ Atmospheric chemistry

Eligibility for both types of internships:

- currently enrolled at a local community college
- legally able to work in the US
- completed general chemistry (organic chemistry or microbiology suggested)

Time Commitment: 20 hrs/wk (minimum) for duration of program

Pay: \$240/wk stipend

To apply, email the following materials to Sherry at s.tsai@oak-crest.org:

- cover letter (include which type of internship you are applying for)
- resume
- unofficial transcript
- letter of recommendation (optional; must be emailed directly by your recommender)
