

Yale | Program to Advance Training in Health and Sciences

Applications are Open!

The Program to Advance Training in Health & Sciences (PATHS) is a 10-month program that provides undergraduate students or recent graduates with a transformative learning experience to support their goal of applying for and earning an MD, MD/PhD, or PhD in the biomedical sciences. Students will be given access to critical online and in-person conversations, trainings, information, role models, mentors, tools, and resources specifically tailored to their future advanced degree track.

This is a great opportunity for students from underrepresented groups who are 1-2 years from applying to an MD, MD/PhD or an PhD program in the biomedical sciences and who may lack similar programs or resources at their institutions. Students will be able to strengthen their applications by participating in a positive learning environment and gaining exposure to a supportive professional network.

Eligibility:

- Undergraduate students or postgraduates who plan on commencing an advanced degree program (MD, MD/PhD or PhD in the biomedical sciences) in 2025 (Applying in 2024 for matriculation in 2025).
- Individuals who self-identify as underrepresented in science
- US citizens or residents and/or international or DACA students

Application Deadline: March 25th
