Yale | Program to Advance Training in Health and Sciences

Applications Open Early Spring Semester

The Program to Advance Training in Health & Sciences (PATHS) is a 10-month program, running from August to May, that provides undergraduate students or recent graduates with a transformative learning experience to support their goal of applying for and earning an MD, MD/PhD, or PhD in the biomedical sciences. Students will be given access to critical online conversations, trainings, information, role models, mentors, tools, and resources specifically tailored to their future advanced degree track.

This is a great opportunity for students 1 to 2 years away from applying to an MD, MD/PhD or an PhD program in the biomedical sciences who may lack similar programs or resources at their institutions. Students will be able to strengthen their applications by participating in a positive learning environment and gaining exposure to a supportive professional network.

Eligibility:

- Undergraduate students or postgraduates
- Applying for an advanced degree program in 1-2 years (MD, MD/PhD or PhD in the biomedical sciences)
- Individuals who may lack similar programs or resources at their institutions
- No limits on citizenship
