

Student Applications Open Now for ToxMSDT

Toxicology Mentoring and Skills Development Training Program

The Toxicology Mentoring and Skills Development Training Program (ToxMSDT), housed at the University of California Davis, is a special opportunity for underrepresented undergraduate students to participate in a year-long mostly remote toxicology training and mentoring program. Funded by the National Institute of Health, the goal of this program is to attract diverse undergraduate students from around the United States to pursue careers in biomedical research, especially in the field of toxicology. Successful applicants will be teamed with a mentor meeting remotely throughout the year. In-person and virtual activities include the program kickoff workshop with the University of California Davis, a visit to the mentor's work site, attendance of the annual Society of Toxicology meeting, and a celebration of the program successes at the Capstone Event with Tuskegee University. Online learning modules are provided throughout the duration of the program to increase mentees knowledge about toxicology. Travel cost support for programmatic activities will be provided by ToxMSDT. This program supplements the regular academic pursuits of students. **Start date is August 16, 2024, with end date of May 31, 2025.**

Eligibility

- Minimum cumulative GPA of 3.0
- Completion of at least one semester of general biology and general chemistry
- Enrolled in an accredited undergraduate institution at the time of application, with continuing enrollment for the next academic year concurrent with the ToxMSDT program
- Member of a group underserved in the biomedical sciences (**NIH Notice**)
- US Citizen or US permanent resident

Applications are open from **January 8th, 2024, until April 26th, 2024, at [application portal](#).**
