

Research Experiences For Undergraduates

Research Topics

- Impacts of harmful algal blooms on food webs, property values, and tourism
- Eutrophication and bacterial pathogens
- Evolutionary impacts of habitat fragmentation
- Environmental transcriptomics
- Ecosystem services
- And more...

Interdisciplinary Research on Human Impacts in the Lake Champlain Ecosystem

Program Focus: The ecological and socioeconomic impacts of habitat fragmentation, eutrophication, and invasive species on the Lake Champlain ecosystem.

Support: \$5,000 stipend, housing provided, food allowance, travel funds.

Eligibility: Must be U.S. citizen or permanent resident, full-time undergraduate student. Students from institutions with limited research opportunities and underrepresented groups are especially encouraged to apply, as are high school seniors entering undergraduate study in 2014.

Application Deadline:
March 1, 2014
